

Slimy, Bonito & Tuna Live Bait Tubes

Keep those livies in prime condition!

The Reelax Live Bait Tubes are the ideal addition to your arsenal in chasing fish this season. They are designed to keep baits in tip top condition by simply connecting the inlet to your raw water pump setup and running water through the tubes. This keeps the livies fresh, and separates rigged baits from tangling in a normal bait tank setup. There are a range of versions available that can sit outside or inside your boat depending on your needs.

These are Australian Made from the highest quality 316 grade stainless steel, and mirror polished to look fantastic on the deck of any boat!
